1

Metal Toggle Cord Locks

To allow adjustment of the OUTER hood, please see the elasticised drawstring design shown. The cord locks will be metal.

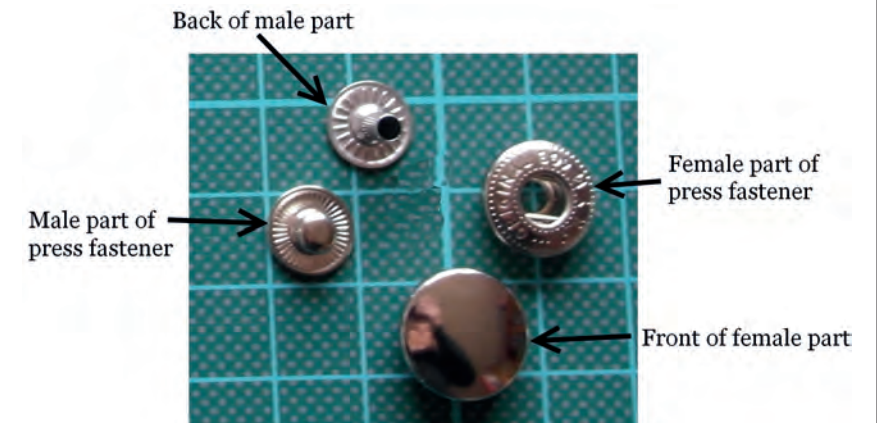

5

Female Metal Snap Button

Elliptical Panels will be sewn as separate components and be attachable/detachable via the metal snap buttons. Next page to explain further

Metal Snap Buttons

Please see the image below to understand the style of metal snap buttons required where located.

The image on the left shows a close up of the layered panel effect i would like to replicate. I like how the edges are not sewn down and a shadow is cast to emphasise the layer difference.

Style of metal cord lock shown below:

Elliptical panels fully attached

Front of female part will be facing outwards as shown.

Elliptical Panel Fully attached

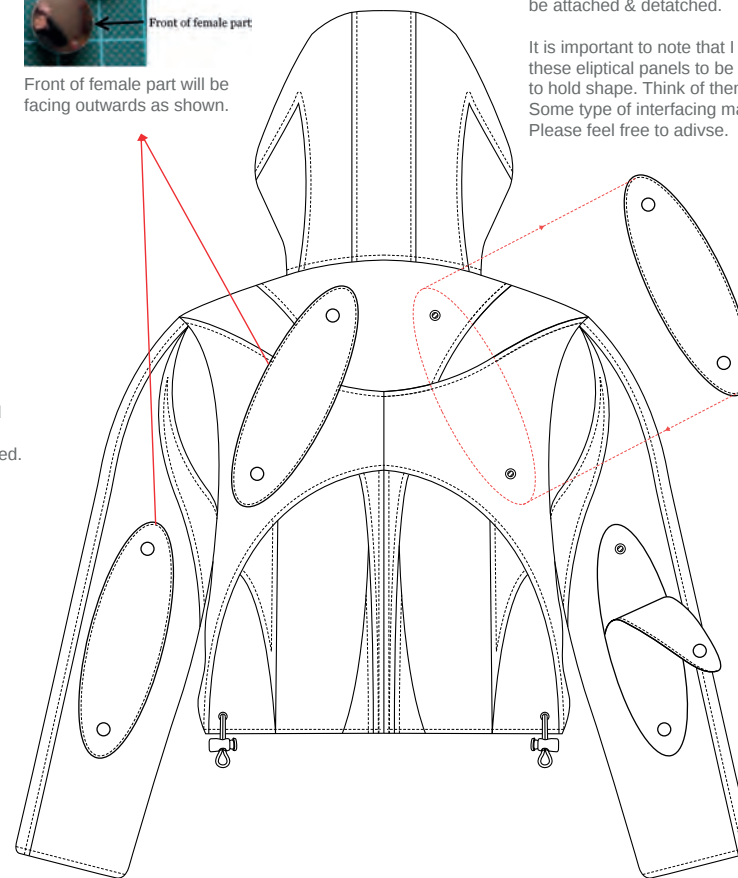

Please see the illustration of the elliptical panels below. This shows how they can be attached & detached.

It is important to note that I would not like these elliptical panels to be flimsy, they need to hold shape. Think of them more as pads. Some type of interfacing may need to be used. Please feel free to advise.
